Digital Equity Research Center

DERC engages in community-based and participatory digital equity research to advance social, economic, and racial justice

Our Work

The Digital Equity Research Center (DERC) at the Metropolitan New York Library Council works with communities to better understand and co-design meaningful responses to local digital equity challenges. Toward this goal, DERC engages in community-based and participatory digital equity research to advance social, economic, and racial justice.

- asset based
- power aware
- respect focused
- justice centered
Pilot Program Evaluation

Evaluation Goals

- To design and implement an impact measurement framework used to evaluate the DI Pilot Program.

- To use the framework to identify opportunities for programmatic scale and to provide DI Partners with qualitative analysis about their work.
### Evaluation Areas of Focus

Research Study

Research Questions

• How are Digital Integrators leveraging existing programs to promote digital advancement in their communities?

• How might the Digital Integrators pilot program foster innovation within motivated digital equity community organizations?
Research Framework

Digital Equity Ecosystems

• Interactions between individuals, populations, communities, and their larger sociotechnical environments that all play a role in shaping the work to advance more equitable access to technology and social, economic, and racial justice.

Key Takeaway #1

Meaningful community engagement, intentional community partnerships, and strong community relationships are key to achieving digital advancement.
Meaningful Community Engagement

**Definition** - Community-based organizations center community members in the design, implementation, and evaluation of programs to ensure their needs and aspirations are considered.
**Definition** - Community-based organizations listen to the needs and aspirations of their community partners and, in response, develop mutually beneficial partnerships that advance common goals.
**Definition** - Community-based organizations center the “entire person” in their support of community members, as they work together to achieve digital advancement.

### Community engagement

“We listened to our community partners. And their needs over the summer are often, ‘We have caretakers and we have youth and we have children, and what can we do where everybody is served at the same time, whether in two rooms or one room?’ And this creates the equivalent of Family Literacy. So it’s family digital literacy.”

- Sharon Morgenthaler

<table>
<thead>
<tr>
<th>Project design</th>
<th>Community partnerships</th>
<th>Digital advancement (sample) indicators</th>
</tr>
</thead>
</table>
| 2-gen model – digital skills training designed for primary caregivers and their children. | Training delivered by Byte Back at Martha’s Table in DC, which offers education programs, pairs healthy food access with physical and mental health services, and promotes family success by investing in family leaders. 'In their own words, the community told us what they need, what they hope for, and what they entrust Martha’s Table to act on.' ([https://marthastable.org/about](https://marthastable.org/about)) | • % of primary caregivers and their children who have received digital skills  
• % of youth who have developed clear pathways from high school to college  
• % of youth who have pursued technology-based careers  
• % of adult caregivers who can participate in the digital economy |
## Intentional Community Partnerships: LIFT-NY

<table>
<thead>
<tr>
<th>Project Design</th>
<th>Community partnerships</th>

</thead>
</table>
| Technology coaching to help LIFT-NY’s member parents build “foundational digital skills” and gain successful career and education pathways | LIFT-NY partnerships with Master of Social Work (MSW) programs (CUNY, Fordham, NYU, Columbia, etc.) to provide MSW students with field work and to provide member parents with coaching and wraparound support | “We are launching for the first time a paid internship... we're extending the length of coaching to promote stronger relationships, especially in the virtual space, really important to be with folks longer and get to know them.” - LIFT-NY Staff | ● % of member parents who have gained foundational digital skills  
● % of parents who have deepened ties with coaches & organization  
● % of parents who have achieved career and educational goals |
### Strong Community Relationships: Equitable Internet Initiative (EII)

<table>
<thead>
<tr>
<th>Community partnerships</th>
<th>Community engagement</th>
<th>Community relationships</th>
<th>Digital advancement (sample) indicators</th>
</tr>
</thead>
</table>
| EII partnered with 123Net (www.123.net) to launch an apprenticeship program, which includes (1) a network field technician position and (2) entry level sales position. Also, partners: Grace in Action in Southwest, Church of the Messiah in Islandview, and the North End Woodward Community Coalition. | “Our 8 week Digital Steward training includes a few lessons around engaging neighbors through community meetings, events, survey...In the training, we actually spend the first few weeks focused on community organizing - not the tech - to really let students see how important the community engagement process will be throughout their work as a steward.” - Janice Gates, Director | “I think with our workforce development strategy, we're trying to think about the entire person... it's just meeting people where they are... we don't just look at them as employees. They are still from the neighborhood, and we still want to offer them the same types of services that they would offer residents in their community.” - Janice Gates, Director | ● % of community members closest to the issues affecting their community are involved in generating solutions and making decision  
● % of community members who have enhanced their skills (networking and community organizing)  
● % of community members who have enhanced their quality of life |
Key Takeaway #2

Digital advancement, rooted in meaningful community development strategies, promotes healthy digital equity ecosystems.

Centering digital advancement can help states be more thoughtful and intentional in identifying digital equity barriers and **co-designing** measurable objectives with **those most impacted by digital inequalities** in IIJA State Digital Equity Planning.
